## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Emmerich.

Emmerich discloses a cutting insert (20), which can be mounted in a tool holder that can be rotated about its longitudinal axis with an essentially conical tip (22), a transition region and a foot (40) for connecting with a tool body (10), wherein the transition region has several spatial areas (24), which are distributed over its periphery and adjoin one another forming spatial and cutting edges; wherein the spatial areas are curved concavely; wherein the spatial areas are inclined so that they enclose an acute angle with the longitudinal axis ; and wherein the spatial areas are rounded as they change over into the foot (40).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
